DANGEROUS DRUGS ACT.

As none of our preparations comes within the scope of the Act, our customers can place their orders with us as usual with every confidence.

QUALITY OF OUR MEDICINES.

All our preparations are composed of nothing but the finest quality ingredients, and our prices are the very lowest compatible with quality.

BREAKAGES.

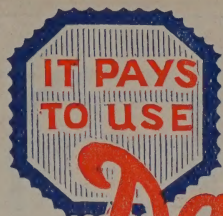

May we respectfully ask our customers to unpack our goods immediately on arrival and report to us any breakage, &c., as no claim for breakage can be accepted unless reported within three days of date of delivery.

N.B.—May we also request customers to take early possession of goods and so save warehouse rent which is charged by the Railway Companies.

DAYS' OF CREWE.

22501575970

Life-Saving Remedies for COWS, EWES, and MARES.

Absolutely indispensable
during the season of

LAMBING, CALVING, FOALING.

DAYS' RED DRINK. (See Page 5.)

**The most reliable preventive of Milk Fever,
Inflammation and Udder Troubles.**

DAYS' RED DRINK cleanses the Cow after Calving; it also exerts a direct action on the lacteals, beneficially influencing the flow of milk. As a general corrective for use at any time, for Indigestion, Costiveness, Off-Appetite, Hidebound, Unthriftiness, or for any sudden unaccountable decrease in milk, no better remedy than DAYS' RED DRINK can be devised. In Canisters, with dose measure, 28/- . Larger Size, 55/- each. In Packets at 16/- per dozen. Carriage Paid.

DAYS' EWE DRENCH, serving exactly similar purposes for Sheep as does the RED DRINK for Cattle. 4/6 per doz. packets.

DAYS' BLACK DRINK. (See Page 3.)

The original and only genuine.

For all cases of Exhaustion, Weakness, Chills after Calving, Lambing, or Foaling. Prompt and reliable in its strengthening effect. For Scour in Calves, Lambs, or Foals. It means new life to very weakly Lambs and Calves.

24/- per dozen Bottles: 13/- per half-dozen. Carriage Paid.

DAYS' OILS. (See Page 7.)

(DAYS' PURIFIED DRIFIELD OILS.) Of the greatest service during Calving and Lambing, soothing and healing to the womb; prevents and checks straining; prevents Inflammation and Gangrene. Unequalled for Sore Teats, Inflamed Udders, or Wounds and Sores of any sort in any animal.

Large Bottles 8/6 each. Small Size 3/6.

DAYS' CHLORAL OPIATE. (See Page 13.)

In severe cases of Paining and Straining after parturition, gives immediate ease, and quickly brings rest and comfort to the animal. Violent heaving is at once checked, and any tendency to Inflammation cut short. 5/- per Bottle.

DAYS' ANTISEPTIC PESSARIES. (See Page 13.)

These Pessaries are a splendid help, and should be used in conjunction with the Red Drink for Cows after Calving.

Price per 6 Dozen.....	120/-	} Carriage Paid.
" 1 "	21/-	
" 1/2 "	11/-	

COMPLETE MEDICINE CHESTS. (See page 27.)

Specially arranged for Calving, for Lambing, for Foaling, for all three combined, or in any way to suit the requirements of patrons. They give the most useful selection of just those remedies likely to be required. They are the last word in convenience; with a Chest close to hand—the right medicine **just when it is wanted**—the farmer may feel security and confidence which entirely outweighs the cost.

Prices £3 10s. and £7 10s.; Small Size £1 15s. Carriage Paid.

THE ORIGINAL AND ONLY GENUINE

BLACK DRINK

OFTEN IMITATED—
BUT NEVER EQUALLED.

Days' of Crewe are the original and **only** Makers of this world-famed Medicine, and it is only genuine when it bears the signature and registered Trade Mark as shown. We emphatically warn our patrons against imitations and cheaper compounds said to be "just as good." There is only one **Days' Black Drink**, and nothing else is "just as good."

The most popular—the most **RELIABLE**,
and withal the most imitated **ANIMAL**
:: **MEDICINE** in the World. ::

DAYS' BLACK DRINK in unequalled for the prompt cure of Colic or Gripes in Horses, Shivering Fits and Chills in Horses or Cattle; for Hoven or Blown Cattle and Sheep.

After a bad time of Calving, Lambing, or Foaling it comes in as the exact remedy; a timely dose of **Days' Black Drink** will be found wonderfully helpful to the dam. Exhaustion is combated, and often enough an odd bottle of **Days' Black Drink** directly enables an animal to turn the corner when prostration is dangerously acute.

Days' Black Drink means new life to weakly calves, foals, and lambs. It is of immense service in Scour of either young or old animals, rapidly checking the "flux" and rebuilding the condition again. For fagged, tired Hunters and overworked horses **Days' Black Drink** is a magnificent pick-me-up; in fact, wherever the need exists for a prompt tonic and stimulant **Days' Black Drink** will prove unfailing.

Per dozen Bottles in boxes, 24/-; per half-dozen, 13/-.
Carriage Paid.

Days'

RED DRINK

—Keep it in readiness
where Cows are kept.

**For Indigestion in Cattle, Loss of Cud, Costiveness, Hidebound,
Sudden falling off in Milk, Garget, Red Water, Feverish tendencies.**

DAYS' RED DRINK should be given to **every** Cow before Calving, and immediately after Calving. It is true that up to the present no absolute specific against Milk Fever has been discovered. But **remarkable immunity** from Milk Fever and Udder Complications is secured where it is made a rule to administer DAYS' RED DRINK as advised before Calving and after Calving. This rule should apply to every Cow without exception, and thousands of owners now adopt it with the best results.

**PRICES :—In Canisters (with dose measure), 28/- . Larger size 55/- ;
Packets, 16/- per dozen, carriage paid. The 28/- Canister
contains the equal of 22½ packets ; the 55/- Canister is
equal to 4 dozen packets.**

DAYS' SPECIAL CLEANSING DRENCH

is prepared specially for use **after** calving, where the Cow fails to
cleanse readily **16/- per dozen packets.**

DAYS' EWE DRENCH

fulfils for Sheep all the same purposes as does the **RED DRINK**
for Cattle. Specially serviceable during the Lambing Season ;
should be administered to all Ewes inclined to high condition
before Lambing, and as a cleansing Drench after delivery.

4/6 per dozen Packets.

For Chest Colds, Sore Throats, Rheumatism, &c., use Days' "Oil of the Night."

OILS

are **UNBEATABLE**
as ready remedies
for **INJURIES** and
ACCIDENTS.

These two preparations, which are spoken of generally as "DAYS' OILS," are able to cope successfully with all the commoner accidents and injuries likely to occur on the farm or in the stable.

In the **PURIFIED DRIFFIELD OILS** we have a remedy possessing wonderfully soothing and healing properties. For all Kicks, Cuts, Wounds, Saddle Galls, Sore Shoulders, Cracked Heels, Sore Teats, Swollen Udders. As a Lambing or Calving Oil it has no equal. Wherever the skin is broken the powerful healing and antiseptic qualities of the **PURIFIED DRIFFIELD OILS** make them indispensable.

The **WHITE OILS** are specially indicated in injuries where the skin is **not** broken, such as all strains and sprains, whether new or of long standing, Sore Throat, Relaxed Tendons, Rheumatism, Windgalls, Capped Hock, Curb, &c.

Either of the above, 8/6 per
large Bottle, which contains
the equal of three small
Bottles. The small Bottles
are 3/6 each.

Days' Zomo-Sal is unequalled for Mares before and after Foaling.

ZOMO-SAL

The greatest BLOOD
TONIC yet discovered
for
HORSES and BEASTS.

Blood Purifying, Tissue Building, Bone Forming.

FOR Anæmia, Humour, Mange, Heat Lumps, Itchy Mane and Tail, Greasy Tendency, "Sweet Itch," &c. For Digestive Troubles—Not Thriving, Sluggishness, Staring Coat, Off Appetite.

DAYS' ZOMO-SAL greatly stimulates every function, waste and effete matters are eliminated more readily, nutrition is encouraged, general condition is thereby wonderfully improved, and a state of vigorous buoyant health is produced, which is **maintained**. **DAYS' ZOMO-SAL** is the tonic with **lasting** effect. It is very largely used, and is without equal for preparing Animals for Show and Sale.

THE FINEST CONDITION POWDER KNOWN.

Brood Mares : Give your Brood Mares **DAYS' ZOMO-SAL** for a few weeks before Foaling, and for a short course after the Foal is born. Scour in Foals is unknown where this is done. The Remedy directly and most beneficially influences the milk, thus the youngster gets a right good start, which means everything to it. Astonishing results have attended the use of **DAYS' ZOMO-SAL** with Mares that were shy breeders.

Fluke or Liver Rot in Sheep : Advanced cases of Liver Rot offer no hope whatever of cure by any Medicine, but when the disease is detected in its earlier stages, the prompt use of **DAYS' ZOMO-SAL** will, in the vast majority of cases, **save the entire flock**, to be sold fat at a good profit instead of turning out a serious loss later on. The small outlay in administering this treatment is repaid many times over.

In Canisters at 10/6, 28/-, 60/-, and 100/-.
In Packets, 6/- per doz. Carriage Paid.

HUSKOLEIN

OUR PRODUCT, THE
FARMER'S SECRET OF
SUCCESS.

For **HUSK** or **HOOSE**, in
Calves, Lambs, and Older Stock.

For **TAPEWORM**, **DIARRHŒA FROM WORMS**, "**HUSK**," **LAMB DISEASE**, **SMALL RED WORMS** in Sheep and Lambs.

For all Unthrifty Animals; for Husky Pigs, for Weaning Foals.
NO FARMER NEED LOSE A SINGLE CALF from **HUSK** or **HOOSE**
if **DAYS' HUSKOLEIN** is given as soon as the disease is noticed.

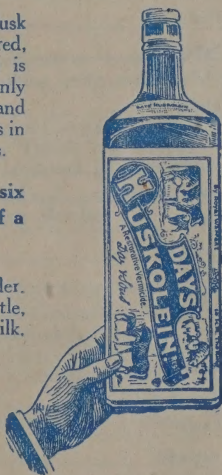

This Medicine loosens and clears out the "Husk Worms," the breathing becomes free and unhindered, the hoose ceases, and remarkable improvement is quickly apparent. **DAYS' HUSKOLEIN** is not only parasite-destroying; it is also a powerful tonic, and picks up the backward animals astonishingly. It is in this two-fold action that its great superiority lies.

In one Bottle there are 60 doses for Lambs six to nine months old, or 15 doses for Calves of a like age.

A measure for drenching is sent with every order. The Medicine is given undiluted from the bottle, or at most only requires the addition of a little milk, so there is no making of gruel necessary.

Large Bottles, 9/-.

Five Bottles, 42/6; Twelve Bottles, 95/-.
Carriage Paid.

The most successful Exhibitors use Days' Zomo-Sal
Days' Zomo-Sal produces the biggest Milk Yield.

DAYS' "AROMATIC BALSAM OF OIL."

This mixture is a very fine blending of oils with a reliable stomachic, and will be found an excellent laxative for Calves, Sheep, or Lambs; especially in cases of Scour or Flux, to remove all irritating matter from the bowels, and prepare the way for the renowned "Black Drink."
Price 3/6 per Bottle.

DAYS' "AROMATIC CHALK MIXTURE."

For Scour, Diarrhoea, Gurr, Flux, or Skit in Cattle, Calves, Sheep or Lambs. This mixture absorbs the acid secretions of the stomach and bowels, soothes pain, and warms and comforts the system. It should be given as a valuable aid to the "Black Drink," which is the great and central remedy in the above cases. **Price 3/6 per Canister.**

DAYS' "CHLORAL OPIATE."

Immediately soothes pain in cases of violent Colic or Spasms and Inflammation of the Bowels, and in Heaving, Paining, or Straining after Parturition in Mares, Cows and Ewes; also after a bad time of Lambing and Calving, this Medicine will be found an unfailing remedy; irritation is allayed, inflammation combated, pain assuaged and a state of restful ease is ensured. **Price 5/- per Bottle.**

DAYS' "ETHERIC AMMONIA."

THE GREAT FEVER DRINK.

For all Feverish Conditions, from whatsoever cause arising. A splendid Fever Draught for Horses, **costing only ninepence per full dose.**

For Influenza, Shivering Fits, Inflammation or Congestion of the Lungs, Bronchitis, Pink Eye, Coughs, and Sore Throat. For Garget. For severe Depression, and Suppression of Urination in any Animals.

It is the finest possible Stimulant in Milk Fever, and should be given every two hours. **Price 36/- per dozen Bottles.**

DAYS' ANTISEPTIC PESSARIES.

These Pessaries are a splendid help when used in conjunction with our Red Drink or Special Cleansing Drench for Cows after calving. They are a great germ destroyer, and their **antiseptic** properties prevent the possibility of septic poisoning, &c., leaving the whole of the generative organs in a thoroughly healthy condition. The Pessaries are also excellent for use after abortion.

Price per 6 dozen, 120/-; 1 dozen, 21/-; ½ dozen, 11/-.
Carriage Paid.

Days' Cuteola prevents "Fly" troubles.

DAYS' "SPECIAL WORM POWDERS."

For Horses and Colts, and for Pigs, 8/6 per Dozen ; or in Canisters at 12/- and 22/6.

(PLEASE STATE FOR WHICH ANIMALS REQUIRED.)

DAYS' "SPECIAL HORSE POWDER."

Unrivalled for Influenza, Pink Eye, Coughs, Colds, Bronchitis, Thickwind, Sore Throat, Asthma, Fever, Low Condition. Usually this powder is given simply added to mash ; but where swallowing is difficult and food not readily taken (as for instance in Acute Sore Throat or Strangles) it makes an admirable Electuary when well stirred up with a little treacle. A small quantity is then smeared on the tongue at intervals, so that the animal receives the full dose within an hour or two.

We do **not** prepare an Electuary, because by this plan our customers may themselves prepare a really efficient Electuary freshly just as it is required for use.

The SPECIAL HORSE POWDER is 10/6 per dozen Packets.

DAYS' "PULVEQUO" (Registered).

A powder to be given in the drinking water for Coughs, Colds, Bronchitis, Asthma, Thickwind, Sore Throat, Strangles, and all troubles of the respiratory organs in Horses and Cattle. Price 9/6 per large Bottle.

DAYS' "ALTERATIVE POWDER."

Of great service in the stable for Heat Lumps, Itching and Rubbing, Low Condition, and all urinary troubles in Horses and Colts. Should be given to all Horses prior to turning out and after taking up from grass. Perfectly safe for in-foal mares.

In Canisters—Price 4/6, 9/-, 18/-, 27/-, and 54/-.

DAYS' "TASTELESS PURGATIVE POWDER."

To be given in the Mash. A great convenience to Horsemen.

Price 8/6 per Dozen Packets.

DAYS' "LIQUID PURGE."

For Constipation, Impaction of the Bowels, &c. Price 15/- per dozen.

DAYS' "KOMOS" (Registered).

For gruellings horses ; entirely supersedes oatmeal.

Nourishing ; Sustaining ; Invigorating.

The greatest amount of nutriment possible within the compass of a small packet.

All City Horses ; Coach Horses ; Dray Horses ; Hunters ; ALL Horses show at once their appreciation of a refreshing and stimulating drink of DAYS' KOMOS. It brightens up a tired horse wonderfully.

To give it a trial is to become a regular user.

12 Dozen Packets for 17/6 ; 6 Dozen for 10/6.

DAYS' "EQUINE BLISTER."

Unsurpassed for Curb, Splint, Capped Hock, Swellings, Bony Formations of all kinds, &c., and for general Blistering purposes. Price 3/6 per Pot.

DAYS' "EQUINE LIQUID BLISTER."

A Splendid Hair-Grower for Shires and Clydesdales.

This preparation can be used to fill the requirements of an ordinary Blister, but its chief use is for the Stimulation of hair growth on the legs, for which purpose it enjoys a large sale. After brushing all dust, &c., out of the legs a little of the Liquid is rubbed into the skin for five minutes or so, enough to produce superficial excitement and reddening, but not sufficient to actually blister; of course, some animals blister more readily than others. This is repeated at intervals of a week, and the result is soon observed in an abundant, healthy growth of "feather."

Price 10/- per Bottle; 40/- per Gallon.

DAYS' "ANTI-STRIKE POWDER."

For the prevention of Striking, Hyan, Speed, Black Leg or Quarter Evil in Calves, &c. This Powder should be given to all young stock during the Season when from past experience "striking" is feared.

Price 9/- per Canister.

DAYS' "SHOULDER LOTION."

A Soothing application for Shoulders not actually sore, but which are tender, requiring constant attention to avoid sores appearing. The Lotion is applied every morning before work, and allowed to dry on—the same last thing at night. Price 2/6 per Bottle.

DAYS' SPECIAL "WART LOTION," 3/- per Bottle.

" " "CORN LOTION," 3/6 "

DAYS' "MYRRHAL COMPOUND."

The most potent preparation for Foot Rot in Sheep, and Foul in the feet of Beasts. For Thrush and Canker in the feet of Horses. (In Liquid or Ointment.) Price 3/6 per Bottle or Pot.

DAYS' "ANTISEPTIC DRESSING"

Should, in all cases, be applied to the Navel String immediately at birth, and daily for about 9 days afterwards. Prevents Navel Ill, and septic invasion per the navel. 4/- per Bottle.

DAYS' "ZYNOLIX."

Cures Mange, Ringworm, Itching and Skin Diseases in Horses, Cattle and Sheep. One Part with Three of Water forms a perfect Antiseptic Lotion for Wounds. Specially recommended for all unhealthy or old Sores or Wounds. For Poll Evil, Fistulous Withers, for Strangles, Abscesses, Grease. 3 Bottles, 10/6.

"HOGWORT"

**CONCENTRATED MEDICINAL
POWDER FOR PIGS—
MAKES PIGS HEALTHY AND
FARMERS WEALTHY.**

"HOGWORT" is not a condiment; it is a highly concentrated medicinal powder—administered in small quantities.

"HOGWORT" is all the sow requires before and after farrowing.

"HOGWORT" exercises untold benefit in abating and controlling feverish or inflammatory symptoms.

"HOGWORT" cools and purifies the blood—eases the whole digestive system—prevents apoplexy, fevers, dulness, loss of appetite, unthriftiness, &c.

In Canisters at 9/-, 20/-, and 50/-. In Packets at 4/6 per Dozen.

DAYS' CATTLE WASH.

This preparation is a Cleansing, Antiseptic Dressing; it is quite different from any article for similar purposes at present on the market. For preparing Animals for Show or Sale it is without an equal.

It is used with water and produces a creamy lather which clears away scurf, &c., and leaves the coat when dry with a fine silky lustre. It is a preventive of contagious skin diseases. **For Washing Dogs**, and the smaller prize animals, also **Prize Fowls**, the Wash is of exceptional value. It may be used with confidence, as it contains no carbolic.

Dogs which get the benefit of a very small quantity regularly with their bath enjoy perfect skins and the best of coats. Mange and surfeit are unknown, and no sign of vermin ever seen.

DAYS' CATTLE WASH is sent out in handy tin bottles containing Five Gallons, 55/-; On Gallon, 12/-; One Quart, 3/6.

DAYS' HORSE BALLS.

(GELATINE COATED.)

Aloetic Physic Balls, 5, 6, 7 and 8 drams.

Condition Balls. Cough Balls. Diuretic Balls. Worm Balls. Grease Balls, &c. Carefully prepared from the finest quality of Drugs obtainable. Will keep perfectly good in any climate. 10/- per Dozen.

Days' Cordial or Nourishing Drench..... per dozen, 13/6

Days' Special Felon Drench..... per dozen, 16/-

Days' Hoof Ointment for Horses..... per tin, 3/-

For brittle and shelly hoofs, keeps the horn of the foot in good condition.

DAYS' SPECIAL POWDER for Rheumatism..... per tin, 4/- and 6/6

For Cattle and Pigs, given in the food.

Days' Special Udder or Healing Ointment..... per tin, 4/-

Days' Special Red Water Drink..... per dozen, 17/6; per half-dozen, 9/6

OIL OF THE NIGHT

(HOUSEHOLD)

An indispensable addition to
the **FARMER'S** household.
"KEEP IT HANDY."

For every Ache and Pain.

For all **SPRAINS, STRAINS, and BRUISES.**
For **CHEST COLDS, BRONCHITIS, and**
SORE THROATS.

For **RHEUMATISM** for **CHILBLAINS.**

For **EVERY PAIN** where the **Skin is not broken.**

Keep a bottle Handy: the best of all
"RUBBING BOTTLES."

Prices 2/-, 2 6, 4/6, and 10/- per Bottle.

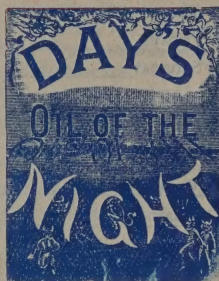

A VETERINARY FORM OF

DAYS' OIL OF THE NIGHT

IS ALSO PREPARED.

For **Sprains, Rheumatism, Swellings, Sprung Sinews Swollen**
Tendons, Sore Teats, and all injuries where the skin is not broken.

PRICES: 3/6 and 8/6 per Bottle.

DAYS' ANTI-ABORTION MIXTURE.

(See also Pessaries, page 13.)

5/- per Bottle; 13/- per gallon.

SPECIAL TREATMENT FOR WOODEN TONGUE,
7/6 per treatment.

"EVERYDAY FARRIERY."

220 Pages.

Over 100 illustrations.

This Volume should be in the hands of every owner of Stock. Its keynote is simplicity, and its contents include treatment, carefully drawn illustrations, and a mass of useful information. **Post Free 2/6.**

DAYS' MEDICINES FOR DOGS.

We supply remedies for practically every Canine Ailment.

DAYS' CUTEOLA

REGISTERED

**SHEEP DIP—*is*
a tip worth knowing.**

(NON-POISONOUS WHEN USED AS DIRECTED.)

This preparation, placed on the market only a few years ago, has proved an enormous success, and in all parts of the Kingdom it is giving the greatest satisfaction. In the Strength of **One Gallon to One Hundred Gallons** of water it leaves nothing to be desired as a Sheep Dip. It cleanses and "feeds" the wool, and leaves a splendid "bloom" on the fleece.

DAYS' CUTEOLA

is a reliable Antiseptic or Insecticide Dressing for Lice on Horses and Cattle—For Itching and Rubbing—For Mange—For Ringworm—To prevent Fly attacks—For Actual Scab Patches—For Maggot Patches. Parasites cannot live in its presence.

ON THE FARM; IN THE STABLE.

Wherever Animals of any kind are kept—a reliable Liquid Disinfectant is a necessity.

DAYS' CUTEOLA

has achieved its great success as an

EFFICIENT, POWERFUL, LIQUID DISINFECTANT

because of its **absolute reliability**. For an ordinary efficient Disinfectant for Stables, Shippens, Kennels, Fowlhouses, Sinks, Cesspools, Cattle Trucks, &c.

DAYS' CUTEOLA is supplied in—

Large Bottles	each	5/-
One Gallon Drum....	„	16/-
Two Gallon Drum....	„	28/-
Five Gallon Drum....	„	55/-
Ten Gallon Drum....	„	100/-

Finest finish—with two tubes, either Flexible or Aluminium as desired.

Price : Pint size, 21/- ; Quart size, 30/-.

Please state whether Flexible or Aluminium Tubes required.

DAYS' DEMON DRENCHER.

For administering medicines to Horses, Cattle and Sheep.

For Cattle (1 quart), 5/6.

For Horses (1 pint), 4/6.

For Sheep ($\frac{1}{2}$ pint), 3/6.

VETERINARY INSTRUMENTS.

We shall be pleased to quote for any article required.

POSTAL INFORMATION.

LETTERS.

Letters not exceeding 2 oz. in weight. Postage, $\frac{1}{2}$ d.; and $\frac{1}{2}$ d. for every additional 2 oz. Size limits, $2 \times 1 \times 1$ ft.

A letter posted unpaid is chargeable on delivery with double postage, and a letter posted insufficiently prepaid is chargeable with double the deficiency.

Railway Letters.—Single letters, 2 oz. weight, can be sent by most railways for immediate delivery at ordinary postage rate ($\frac{1}{2}$ d.) plus fee of 4d. Letters forwarded by next available train and delivered by postman.

POST CARDS.

Thin, $\frac{1}{2}$ d.; stout, $\frac{1}{2}$ d.; reply, with 1d. stamp on each half, $2\frac{1}{2}$ d.

PRINTED PAPERS.

This post is intended chiefly for printed and partly printed documents not in the nature of a letter. Packets must be open to inspection. Limits: Weight, 2 lbs.; size, $2 \times 1 \times 1$ ft.; $\frac{1}{2}$ d., for each 2 oz. or portion.

SAMPLE POST.

Samples cannot be sent by inland post except at Letter or Parcel rate.

INLAND PARCEL POST.

The rates of Postage for Parcels are—

	s.	d.
Not exceeding 2 lb. in weight	0	6
Exceeding 2 lb. but not exceeding 5 lb.	0	9
" 5 lb. " " 8 lb.	1	0
" 8 lb. " " 11 lb.	1	3

No parcel exceeding 11 lb. in weight can be sent by Parcel Post.

No parcel shall exceed 3 ft. 6 in. long, or 6 ft. length and girth combined.

NEWSPAPERS.

The postage for newspapers is 1d. per copy up to 6 oz. in weight, and for every additional 6 oz. $\frac{1}{2}$ d. No package must exceed 2 lb.

STAMPS.

Books of stamps, containing eighteen $\frac{1}{2}$ d. and six each 1d. and $\frac{1}{2}$ d. stamps, are issued at 3s.; book of twenty-four $\frac{1}{2}$ d. stamps, 3s.

FOREIGN AND COLONIAL SERVICE.

To British Possessions, the United States, Egypt and Tangier, and to H.M. Ships and Troops serving abroad the letter rate is $\frac{1}{2}$ d. the ounce, 1d. per ounce after. To all other foreign countries $2\frac{1}{2}$ d. for the first ounce, and $\frac{1}{2}$ d. for each ounce after.

Post Cards for British Possessions, &c., must bear a $\frac{1}{2}$ d. stamp, reply-paid 3d.

Printed papers $\frac{1}{2}$ d. per 2 oz.; limit of weight 4 lb.

Samples may be forwarded abroad at the prepaid rate of 1d. for the first 4 oz., $\frac{1}{2}$ d. per 2 oz. after.

The fee for registration for all correspondence abroad is 3d.

Insurance of articles of value sent through the post is 5d. up to £12, 2d. each £12 after. Advice of delivery of registered and insured articles will be sent on payment of 3d.

Duly registered Newspapers, Magazines and Trade Journals may be despatched to Canada and Newfoundland under certain conditions as follows:—Over 2 oz. and under 6 oz. 1d., up to $1\frac{1}{2}$ lb. $\frac{1}{2}$ d., and $\frac{1}{2}$ d. for each succeeding $\frac{1}{2}$ lb. up to a limit of 5 lb. Packets not exceeding 2 oz. weight are transmitted for $\frac{1}{2}$ d., as ordinary printed papers.

ORIGINAL "UNIVERSAL"

MEDICINE CHEST

—you'll need it,
day by day—

Particularly to those who are favouring us with an order for the first time would we recommend the Complete Chests; the clearest instructions are sent out with all our Medicines, and where a supply is kept in readiness no cowman or stableman need hesitate one moment when illness or accident appears. The value of animal life saved in this way must, in the course of a year, be truly enormous.

Contents of "Original" Medicine Chests.

No. 12.—Universal Chest,

Price £7 10s., contains

- 1 dozen BLACK DRINK. 1 dozen RED DRINK.
- 2 bottles PURIFIED DRIFFIELD OILS.
- 2 bottles WHITE OILS. 1 bottle HUSKOLEIN.
- 6 packets SPECIAL HORSE POWDER.
- 1 canister ZOMO-SAL.
- 2 canisters AROMATIC CHALK MIXTURE.
- 1 dozen EWE DRENCH.
- 1 bottle MYRRHAL COMPOUND.
- 2 bottles CHLORAL OPIATE.
- 3 bottles ETHERIC AMMONIA.
- 1 bottle AROMATIC BALSAM OF OIL.
- 1 pot EQUINE BLISTER.
- $\frac{1}{2}$ dozen ALOETIC PHYSIC BALLS.
- 1 dozen HOGWORT. 1 bottle ZYNOLIX.
- 1 Guide, "EVERYDAY FARRIERY."
- 1 lb. ANTISEPTIC LINT.

Handsome Polished Chest with lock and key, Corkscrew, Measure Bottle, and Demon Drenching Bottle.

No. 15.

Horsekeeper's Chest,

Price £7 10s., contains

- 2 dozen BLACK DRINK.

Chest complete with Demon Drenching Bottle, Corkscrew, and Measure Bottle.

We have pleasure in again including in our "ANNUAL" a contribution from so eminent an Authority on all matters Agricultural as Professor Long.

This article will, we are sure, appeal to our readers.

The Most PROFITABLE BREEDS of BRITISH CATTLE for **MILK and BEEF**

IF the breeds of cattle of Great Britain are not more numerous than those in other countries, they are at least of much greater value, whether as milkers, or for the production of beef. I happen to be acquainted with the cattle of France, Switzerland, Holland and Denmark, and to some extent of Germany and America, which consist of most of our own varieties. British cattle may be divided for the purpose of discussion between the English and the Scottish breeds, the latter consisting of the magnificent and picturesque West Highland, the Aberdeen-Angus and the Galloway, both of which are black, and all beef producers of the highest order—and the Ayrshire, a milker of a highly typical character, but not a producer of beef. We may say the same of British Cattle, although there is a wider difference between the finest we possess, and the least attractive.

It will be remembered by most experienced readers that it is only within the last 40 years that the yield of milk commenced to increase, and that yield was very slow. We have, indeed, like the Dutch and the Americans before us, produced many individual milkers of the highest order, but "one house does not make a city." These have, until quite recently, been few and far between, and relate chiefly to the Dutch or Friesian. A cow of this class took the first place above a Jersey at the last great milking trials of the United States, whereas Dutch cattle were excluded at the equally great but shorter show at Chicago. In discussing the most prominent varieties which this country produces, including those of Wales, we are compelled to state plain facts, and so we take the Shorthorn first.

The English Shorthorn is practically divided into two families, although it is just to say that there are some pedigree beasts which are good milkers, and some Dairy Shorthorns which are not. Herds of pedigree cattle which have been bred for milk for years if not equal to the Friesian, are very different from what they were, especially considering that they are in the Shorthorn Herd Book. We have probably failed to reach the same standard of the Friesian as the Dutch and Americans even 40 years ago, when they were ridiculed because we had not made the attempt. The Dairy Show has seldom received a first-class milking Shorthorn until recently—I mean during the last few years. These cattle are not always of the regulation type. It appears to me to be as difficult to fix milking properties on a pedigreed beast of the fixed type of Shorthorn as on a Hereford, a Galloway, or as beef on an Ayrshire or a Friesian. There has been for the last forty years a great deal of discussion, and some experiments made in order to produce what is still called a “double purpose cow.” There is no such variety or breed. Shorthorn men with first rate stock have occasionally bred such a cow and exhibited her with success, but I do not think the same can be said of any other breed. Practically our cows are divided into two varieties, the beef producers and the milkers. We have, therefore, to discuss their respective merits. Let us continue with the Shorthorn.

The national breed are red, red and white, roan, and all white as the favourite colours; these are kept in all parts of the country, even in the strongholds of Scotland, Hereford, East Anglia and Sussex. To begin with, among her economical properties the cow has a white skin, and is, in few words, so far as shape is concerned, “*Multum in parvo*,” or “Much in little.” She is a blocky beast, like a contracted parallelogram. The head is small, like the small inward curved horns, the neck short, forming a corner of a straight line down to the brisket. The top line is straight from the base of the head to the root of the tail, although many faulty beasts have large bunches of flesh on either side of it, which spoil the formation. The ribs are of great width, being well sprung out of the body, consequently giving larger size, and a larger quantity of meat to that part of the carcass. The neck is comparatively fine, but not too short, the thighs are large, thick and heavy, and like the loin, carry a large quantity of meat, but of less valuable quality. The loin, and especially the sirloin with the undercut of flesh, is the prime part of the carcass. That, I believe, gives the name to the tender loin steak which I so much enjoyed in America. The legs are fine in quality, and bony, considering the

great size of the beast, while the bottom line carried from the brisket to the base of the thigh, should be as straight as the top line. Altogether the blocky body stands upon four short legs placed four square. I believe the Roans are the most popular with Shorthorn men, and then the Reds and Whites, but the Whites are not popular, although they have occasionally taken prizes. In inspecting the Shorthorn classes at the great shows, it is always noticeable that first-class beasts are mixed up with too large a number of inferior beasts, which have no chance of winning. Farmers and others who breed Shorthorns should make a point of judging their own stock as well as those of other people, if they did so, they would save themselves much expense and many heartaches, because when these cattle get to the show, and are seen by the side of first-class beasts, the owner at once recognises the futility of his chance. This breed is famous for its beef, and what we want is to see it equally famous for its milk. There is a breed of Shorthorns which are termed Dairy Shorthorns, and these are supposed to be bred entirely for milk, although some persons make an equal point of striving to obtain the formation of the beef-producing Shorthorns. I remember when it was very difficult to obtain the slightest knowledge of a cow yielding a thousand gallons of milk in a year, but now there are many, and although we do not yet expect to hear of a two thousand gallon Shorthorn, still less of a three thousand, these figures have been reached by cattle of other breeds.

We now come to the Hereford, on which we may at once remark that she is not a milker, and although she has been reputed to be unable to feed her calves, she will, of course, produce milk, although in minor quantity. The Hereford is chiefly confined to its own county, and I have seen in that county, herds of some of the finest cattle which the world can produce. The colour and form of the head are noticeable anywhere with whatever cattle they may be mixed. Although there is no such thing as mathematical marking in the Hereford, breeders still strive to maintain the ancient marking on the face and front, the white sometimes going down the spine and other parts of the body. This peculiar formation of the white splash, together with the broad head which always seems to show gentility in the face, and the wide spread horns, mark the Hereford as a breed to be desired. It is unquestionably one of the two best—if it may not be bracketed with the Shorthorn—meat producers in England. Hereford cattle are reared to perfection, and in quick time. The best breeders find it necessary to feed them so well from birth, that they are practically matured at 14 months, and may be sold at a size equal to that

of a matured beast at 22 months, when fed in the ordinary way. The Hereford endures training with equanimity. It is quite willing to be shown how to bend to the will of its breeders, and yet to show off its points to a prospective buyer or judge, and it is an example of what modern breeders are doing.

We now come to the Devon which may be at once stated as divided into two, and there used to be three varieties, but I think that we may include them in two lots, the North and the South Devon. The former is bred for beef as shown at Smithfield, the latter is bred for milk, and I almost may say for beef as well, as it is blocky, bulky, fleshy and kills well like a Shorthorn. A herd of South Devons is one of the prettiest sights to remember, and I recollect with pleasure the herd of 200 cows which the late Mr. Samuel Vosper showed me in one of the park-like pastures near his house in the south of the county. These cows milked well, I may say splendidly, and the cream and butter made from them was sent into Plymouth, where they found a good and ready market. The rich colour of the milk was not one of the least valuable properties which it possessed. The South Devon is red like the North Devon. It has a kind countenance, a head of medium size, horns not too long, a good straight fleshy body, and although the symmetry of the beast is not equal to that of a good Shorthorn, many of the cows exhibit well and take prizes, chiefly for their milking property. This breed is one example of the fact that you cannot make a fine milker into a beast of perfect form. The North Devon as shown at the great winter shows are more adaptable to their particular purposes. They are of a smart appearance, well finished, and well equipped beasts, and although not owning the formation and size of the Shorthorn, Hereford and Aberdeen, they come off wonderfully well, but would seldom take a championship. I have, on two or three occasions, examined the herd of Mr. Morris, of St. Albans, a particularly good breeder who wins numerous prizes at the great shows, and who has a splendid eye as a judge. The North Devon contains a good deal of meat in a small space, and that meat is excellent.

If we were to look at the rest of the cattle at Smithfield we should be surprised to find how much better the cross-breds are still than some of the pure breeds, but a first cross is a costly way of producing a good beast, although the process cannot be continued indefinitely from the same stock. Some of the Red Polls of the eastern counties and elsewhere are renowned as milkers, others are equally renowned as beef-making cattle, but while the milking stock yield well, I may say exceptionally well, as they are

bred to-day, I do not think their meat making capacity has increased with their milk yield. These cattle are of a brighter red than some of the great beasts in England, and they are polled—in other words, they have no horns. Their bodies are growing more shapely, and great attention is being paid to their points in all directions. We may, in fact, place the Red Polls among the first-class milkers of England, but we certainly cannot say the same of the breed as meat producers.

Sussex cattle are peculiarly common to parts of Kent. I know of no breed which has been so largely improved in the last 30 years. At one time, although large, they had no approximation to the shape of a perfectly good beef-making beast, the legs were too long, the body was not deep nor thick enough, nor were the other parts of the carcass as they should be. The horns, too, were curved, and had probably been bred to no type, on account of the fact that these oxen were especially used for ploughing and other work on the farm. I remember, as a school boy, when wandering over the Sussex Downs, frequently noticing these red cattle, and finding them at work in fours and sixes, but always with a boy behind them to prick them with a goad, which gave them a hint that sharper movement was required. Although Sussex has no reputation for horses, it has a great reputation for cattle and sheep, for the South Down practically stands at the head of the flock in England, while the cattle are now approaching in that direction. If examined at Smithfield or the Royal Show, it would be noticed that their form is gradually inclining towards the true type, as exemplified in the Shorthorn, the Hereford and the Devon. It has, indeed, been mistaken for the Devon by many farmers and others who are acquainted with the live stock in agriculture, and as the Devon shown at the great shows is a beast of first class, so we must consider the Sussex, when they are so good that they resemble so excellent a beast. The Sussex is all red, and so near the red of the Devon that from this point of view it might easily be mistaken for it. Its top and bottom lines are straight, it is gradually becoming four-square, and it is a favourite with all those who know it, especially in the two counties, as well as in parts of Surrey where it is so regularly bred.

Now we come to the Jersey, which may be regarded as the most perfect of the milking varieties. The Jersey, whose origin is the Channel Islands, is one of the most beautiful cattle we have in this country, or which exists in any country. It is bred in a variety of colours, the most perfect of which are silver-grey, silver-fawn and fawn. Some cows are of a fawn and white, while others are mulberry, for they almost resemble the mulberry

in colour. This cow is small, weighing, perhaps, 900 lbs., but the very finest specimens have produced 550 lbs. of butter in a year and over 1,500 gallons of milk. The head is small and sometimes dished, that is to say, there is a gentle curve between the nose and the forehead. Her horns, which are yellow at the base and black above, are small and curve inwards as if the ends were striving to meet. The ribs are well sprung, but there is no attempt to obtain the shape which applies to beef-making cattle. The tip of the tail is black, like the points of the body, the knees and the nose. The inside of the ears, like the skin between the belly and the udder, is yellow, or should be, for it is confidently believed that all yellow-skinned Jerseys are richer milkers than others of the breed. It must not be supposed that all the Jerseys one meets are of this character, for the majority, carelessly bred and reared, are poor milkers, and have no value in their flesh. Guernsey cattle in some respects resemble the Jersey. The best breeders are making every attempt in their power to obtain the same form which belongs to the Show Jersey, especially in the fineness of the body and the umbrella-like manner in which the skin is stretched over the framework. The udder, in both cases, should be globular with very thin skin as a cover. The Guernsey, which is a little larger cow than the Jersey, sometimes milks as well, and in one instance I remember has milked better than any Jersey which I have known except the winner at one of the great American contests. Instead of a black nose and tongue, the Guernsey is white in these parts. The colours differ slightly, some cows being more like a lemon than orange in colour, while it has been claimed on the part of the breed, by one of the most prominent breeders of the past, that steers can be made quite respectably fat for the butcher. If a Guernsey cow yields 1,000 gallons of milk in a year it should be taken care of, as although this figure has been frequently exceeded, it is not often reached.

Although the Kerry is an Irish beast, she has been made what she is by the English breeder. She has grown larger, fleshier, better in form, with finer horns—although they are still quite lengthy—and what is more, she has been used for cross breeding by experimenters with the object of ascertaining her value as a cross. She is an excellent milker, and for her size probably produces—in the case of the best specimens—more milk than any other cow in the country. The milk is rich, but it is not to be compared with that of the Jersey and the Guernsey. The cows upon the Kerry Mountains in Ireland are poor specimens as compared with the cows in England of the same breed.

Now we come to Scotland, and we may fairly commence with the Ayrshire breed, which is the one and only first-class milker in the country. The Ayrshire is a cow of medium size, slightly larger than the Guernsey, although comparison is difficult. She may be known wherever she appears by the curious length and form of her horns, and by the equally curious arrangement of her colour. The Ayrshire is a cow with a fine fore-quarter, a straight back, a prominent abdomen, and a flat udder, which usually requires a woman to milk it. With these conditions, the Ayrshire is as prominent in her appearance in Scotland as the Jersey is in this country. She is a cow of many colours, sometimes nearly all white, and this is especially the case with bulls, slightly splashed or spotted. In other cases she may be yellow, black or brown, with a larger proportion of colouring than the white, but you never know what colour a calf is going to be. The cow is a smart dappled beast, with a fine tail, good legs, and a good specimen may be estimated to milk well. As Scottish farmers in the two western counties where these cattle are chiefly kept have formed a Herd Book, and have determined long since to increase the yield in them, it may be said with certainty that they have already done so, and that in consequence the value of the beast has materially increased. The most important of all the Scottish breeds, all but the Ayrshire described above, are bred for the production of beef, and no cattle in the world produces so much in so small a space as the Aberdeen Angus. The standard colour is now black, and at the great shows not a speck of white is to be seen in the classes. The two local varieties were blended into one, the most famous of which was a Doddie. The frame or structure is symmetrical, and no beast, not even the best of the Shorthorns, carries her form so well. The Aberdeen Angus cows are not good milkers, and apparently no attempt is made to breed them with that object, but they cross well with the Shorthorn, and make some of the finest cattle shown at the great exhibitions, especially at Smithfield in winter, when they prove to be some of the finest and heaviest beasts, and almost all blue-grey in colour. They have no horns, but a fine head with a beautiful countenance, and are principally bred in the counties of Aberdeen and Forfar. There is no beast which affords a breeder of stock such an opportunity of learning what is best than this variety.

The Galloways are also black and polled, that is, they have no horns. They are sometimes bred to other colours, including red and brown, but we seldom see them in the south or at any of the smaller shows. They are similar in size to the Polled Angus, but the hair is not so fine, and is curled.

The head is not so fine as the breed just referred to, but it is wider and shorter, and the ears are less happily placed. The upper line from the neck to the root of the tail is straight, while the legs are strong and short, as those of good cattle usually are. The Galloways are usually fattened at home, although in former days they used to be sent into the eastern counties to be finished. They feed well, and are sought eagerly by those who have been accustomed to feed them.

The Kyloes or West Highland cattle are large, hardy, splendid producers of beef, and are found in various colours. At one time the black was the principal colour, but I notice that in competition the majority of the beasts are brown, dun, or brindled, and sometimes a colour which may almost be described as red. Their heads are very prominent, like their large piercing eyes. The horns are large, widespread and turn slightly upright, the tips being black or red. The head is very shaggy like the coat, which is covered with thick, glossy hair. They produce the best of beef. This breed is found in the north-western parts of Scotland, and especially in Argyllshire.

The cattle of North Wales, Anglesey, Cardigan, and Carnarvon furnish the Runts that were formerly sent largely to England for feeding. They are not always wholly black, although the majority of the cows have no white markings, but are very well furnished with a strong body, excellent thighs, and straight broad backs. There is a fault in the upper line, however, which is usually too high behind the hips. Some of these Welsh cattle are of great value, for they have been immensely improved during the past 20 years. There are other Welsh breeds called the Pembroke, the Castle Martin, and the Glamorgan, which are black with a white spine and white over the belly, but some of these breeds used to be brown and red.

The non-pedigreed stock of the country, with a few exceptions, among them the Devon, the Sussex and the Red Poll, are generally coloured like the Shorthorn. The more extensively cattle become pedigreed the quicker shall we obtain more productive stock. It must, however, be remembered that an entry into the Herd Book does not constitute an eligible beast for breeding. The animal itself must correspond with his pedigree, and that is not always the case. We find the fact in the case of man. The power to perpetuate good stock lies in the sire and dam, but that appearance must not be casual, but by long and careful breeding from one stock practically perpetual.

IF a few minutes of each Saturday evening are regularly devoted to just jotting down the figures in these columns, and "DAYS' ANNUAL" kept from year to year, how useful it will be found to compare the yields of one year, or one quarter, with another.

Days' of Crewe.

OUR TERMS OF BUSINESS.

CARRIAGE.

We bear carriage on all orders over 10/-, and where any charge is made we shall be glad if our customers will immediately correspond with us to Crewe.

CREDIT.

We allow six months' credit to regular patrons, but deliver all accounts at Lady Day and Michaelmas. Our customers will please understand that, although every account on the ledgers is then rendered, those accounts not due are only sent for verification, and if found or thought wrong in any detail, we ask for a communication through the post to Crewe. New customers would oblige, with first order, by giving a reference or stating through whose recommendation the order is sent.

DISCOUNT FOR CASH.

For orders of £2 and upwards we allow for cash in 14 days, 5 per cent.

REMITTANCES PER POST.

Stamps and Postal Orders may be sent for small amounts (P.O.'s preferred). Post Office Orders and Cheques should be made payable to **DAY & SONS, CREWE, Ltd.** Coin and Treasury Notes must in all cases be carefully secured and registered.

LETTERS AND "NO NAME" ORDERS.

Sometimes letters are sent and do not reach us, and sometimes we receive orders with no name. As we very carefully attend to and file all communications, and despatch goods on same day order arrives, it may be taken that, should no reply or compliance be made in a couple of posts, the letter is not signed or has not reached us. Communications of a confidential nature should be marked across the envelope "Private."

CHANGES OF RESIDENCE.

We should esteem it a very great kindness if our patrons would make us aware of any change in their address.

RECOMMENDATIONS.

To these we owe much, and are most sensibly grateful. Many customers have written for our order forms, and placed them amongst their friends; in such cases we should be glad if the patron doing us this honour would write inside the form, "Recommended by Mr _____, of _____" We should then know to whom we are indebted for this signal favour.

Only One Address—

DAY & SONS, CREWE, LTD., CREWE.
